Une identification rapide de composés naturels de plantes par CCMHP

Expériences en pédagogie

Dans le cadre des TP de Pharmacognosie en 3^{ème} année de Pharmacie:
Extraction et caractérisation de dérivés anthraquinoniques

- Rhéine chez Rhubarbe officinale
- Rhaponticoside chez Rhubarbe des jardins

Une identification rapide de composés naturels de plantes par HPTLC-MS

Expériences en recherche

I) Identification de polyphénols dans des plantes de Djibouti:
*fruits d' *Indigofera caerulea**

II) Identification d'anthocyanes dans des plantes du Burkina Faso:
*fleurs de *Tapinanthus dodoneifolius* et *Eichhornia crassipes**

I) Identification de polyphénols dans des plantes de Djibouti: fruits d' *Indigofera caerulea*

Caractérisation structurale

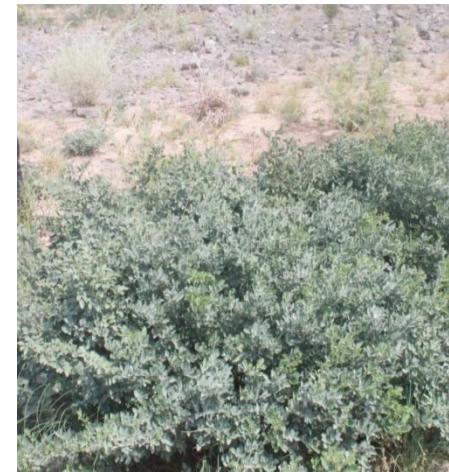

Composés purs

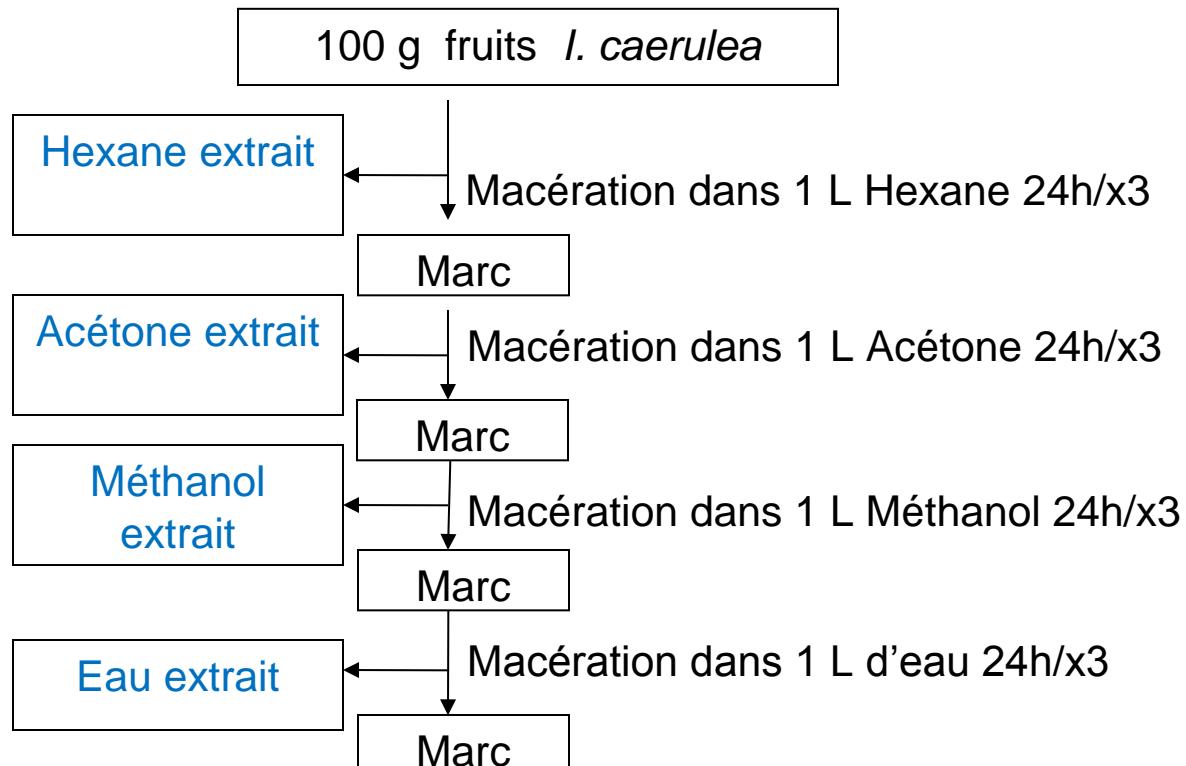

Caractérisation pharmacologique

Indigofera caerulea

Lieu de récolte: Abaitou, Dikhil (Djibouti)

Preparation des extraits avec des solvents de polarité croissante

fruits secs

Activité antimicrobienne des extraits de fruits d'*I. caerulea*

Pathogènes	Concentration Minimale Inhibitrice CMI (µg/mL) des extraits			
	Hexane	Acétone	Méthanol	eau
<i>Acinetobacter baumannii</i> ATCC19606	256	>256	>256	>256
<i>Escherichia coli</i> ATCC 25922	>256	>256	>256	>256
<i>Enterobacter cloacae</i> ATCC 13047	>256	>256	>256	>256
<i>Enterococcus faecalis</i> ATCC 29212	128	>256	128	>256
<i>Klebsiella pneumoniae</i> ATCC 700603	>256	>256	>256	>256
<i>Pseudomonas aeruginosa</i> ATCC 27853	>256	>256	>256	>256
<i>Staphylococcus aureus</i> ATCC 29213	256	>256	128	>256
<i>Candida albicans</i> ATCC 10231	>256	>256	>256	>256
<i>Aspergillus niger</i> ATCC 16888	>256	>256	>256	>256
<i>Aspergillus fumigatus</i> ATCC 1022	>256	>256	>256	>256

- ❖ Les extraits hexanique et méthanolique montrent des activités antibactériennes significatives contre *S. aureus* et *E. faecalis*.
- ❖ Seul l'extrait hexanique montre une activité antibactérienne contre *Acinetobacter baumannii*.

Activités antioxydantes des extraits de fruits d'*I. caerulea*

Determination: des activités antioxydantes selon les méthodes DPPH, ABTS et FRAP
de la teneur en polyphénols totaux (TPC) et flavonoïdes (TFC)

	DPPH IC50 ((µg/mL))	ABTS IC50 ((µg/mL))	FRAP µmol Evc/g d'extrait sec	TPC (mg EAG/g d'extrait sec)	TFC (mg EQ/g d'extrait sec)
ME	97±2,2	25±1,3	625±3,1	185,1±3,1	23,1±2,3
AC	150±3,4	20±1	828±3,6	32,46±3,0	8±1,4
Vc*	70±7	70±1,5	-	-	-
Tx*	110±2,5	18±3,3	-	-	-

Standards: Vc: vitamine C Tx: Trolox

ME: Méthanol AC: Acétone

II) Identification of anthocyanins in various plants from Burkina Faso by HPTLC/MS

Background- Anthocyanidins chemistry

Anthocyanidins

R-groups: -H, -OH and / or -OCH₃

Pelargonidin

Cyanidin

Peonidin

Delphinidin

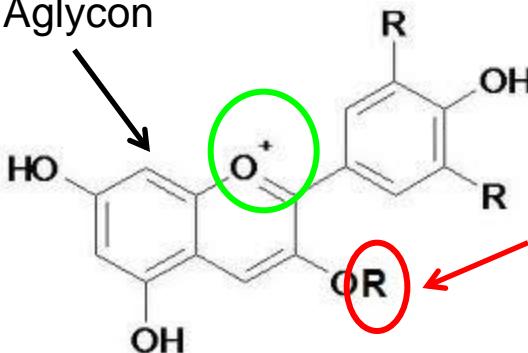

Petunidin

Malvidin

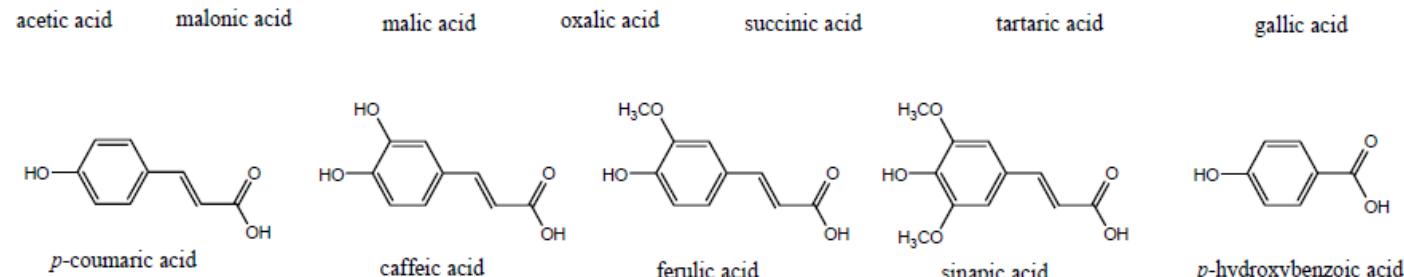

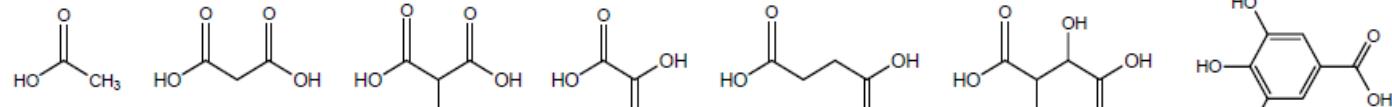

Background- Anthocyanins

> 300 structurally different anthocyanins

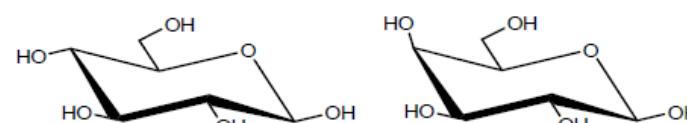

Aglycon

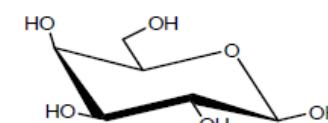

2-Phenylbenzopyrylium cation

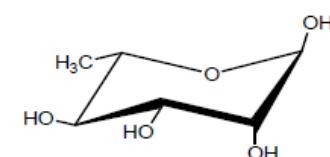

Sugars

β -D-glucopyranose

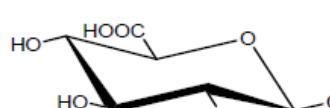

α -L-rhamnopyranose

β -D-xylopyranose

α -L-arabinopyranose

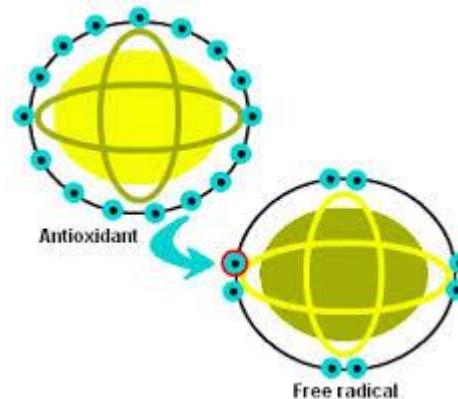

β -D-glucuronic acid

Acyl moiety

Are used as a food-colorant

E163

Have antioxidant properties

Potential therapeutic role to:

- Cardiovascular diseases
- Cancer
- Inhibition of several virus
- Improvement of visual acuity
